

Solution 2: Give me your feature name and I'll call you

ETH Zurich

1 Zurich needs more stations

Listing 1: More feature calls

```
explore
    -- Modify the map.
    do
        zurich.add_station ("Zoo", 1600, 500)
        zurich.connect_station (6, "Zoo")
        zurich_map.update
        zurich_map.fit_to_window

        wait (3)
        zurich_map.station_views.item ("Zoo").highlight
        wait (1)
        zurich_map.station_views.item ("Zoo").unhighlight
        wait (1)
        zurich_map.station_views.item ("Zoo").highlight
        wait (1)
        zurich_map.station_views.item ("Zoo").unhighlight
        wait (1)
        zurich_map.station_views.item ("Zoo").highlight
        wait (1)
        zurich_map.station_views.item ("Zoo").unhighlight
    end
```

2 Introducing yourself

Listing 2: Introduction

```
execute
    -- Run application.
    do
        Io.put_string ("Name: ")
        Io.put_string ("John Smith")
        Io.new_line
        Io.put_string ("Age: ")
        Io.put_integer (20)
        Io.new_line
        Io.put_string ("Mother tongue: ")
        Io.put_string ("English")
        Io.new_line
        Io.put_string ("Has a cat: ")
```

```
Io.put_boolean (True)
end
```

3 Command or Query?

1. *name* is a query.
2. *add_line* is a command.
3. *stations* is a query.
4. *connecting_lines* is a query.
5. *move_all* is a command.
6. *west* is a query.
