

Code delivery

Deadline: May 10th

The results of *C#* project should be put in the SVN repository. You should get the account and password for accessing the SVN repository. Please follow the following steps to check in your assignment1 results:

1. Create a subdirectory named "assignment1" within your SVN directory
2. Put file `position.txt`, `white_action.txt` and `Chess.exe` in this subdirectory so that I can execute command `Chess.exe position.txt white_action.txt` to get the moves of the white player stored in `white_action.txt` based on the piece positions described in `position.txt` file
3. Put the class diagram file and project documentation file in this subdirectory
4. Put your visual studio 2005 project (please delete the `bin` and `obj.` subdirectory from the project) in this directory
