

Distributed and Outsourced Software Engineering (DOSE 2014)

Assignment 1: Setup

(Mandatory)

Deadline: Friday, October 10th 5pm (CET)

Communication Rules

There are several universities involved in this project. Good communication is **important**. Please, when you send any e-mail to the assistants or your colleagues start the subject with: **[dose2014]**. Furthermore, when you sign the e-mail, always **add your group number** (you will get a group number soon), and the name of the university you are from.

Watch the introductory lecture held at ETH (recorded during DOSE 2012):
<http://youtu.be/nhsLehOzYIU>

Codeboard

Codeboard, a tool implemented by Christian Estler and Martin Nordio (ETH Zurich), will be used for simple programming homeworks. After all the groups are created, you will receive a few homeworks during the project, and all students will have to finish them in one week. These homeworks are short and simple (it will take only 15-30 minutes to solve them) and they are **mandatory**.

Task: create a Codeboard account at:

<https://codeboard.io/signup>

Repository and Teams

Google Code will be used as our software development and collaboration platform. Every team member should have a Google account and a Codeboard account and **one team member** must fill in the following form:

<http://tinyurl.com/dose2004-reg>

This form requires the following information:

- University:
- Team member 1:
 - Name:
 - E-mail:
 - Goggle Account (if different from e-mail)
 - Codeboard user name:
 - Skype id (at least one member of the team should have an skype id):
- Team member 2:
 - “”
- ...
- Team member X:
 - “”
